EDUCATION

University of California, Los Angeles (UCLA)

Statistics & Data Science, minor in Data Science Engineering - 3.9 GPA

Los Angeles, CA

Expected March 2027

PROFESSIONAL EXPERIENCE

Seattle Mariners

Baseball Projects Intern

Seattle, WA

June 2026 - August 2026

- Contributed to player development, acquisition, evaluation, and valuation within the Mariners' front office
- Created a new R Shiny application to support review of on-field play and player development throughout the organization
- Integrated the new application into existing SQL and Airflow pipelines
- Worked with colleagues to standardize environments and ensure reproducibility across users

Pro Football Focus (PFF)

Football Data Collection Analyst

Remote

August 2023 - June 2026

- Created Data to be sold to all 32 NFL teams, as well as all FBS college football teams
- Collected data on coverage performance through the All Coverage unit, showing mastery of NFL defensive schemes, player techniques, and separation charting
- Took on a Supervisory role with the PP Review Process, entailing viewing disagreements between team members on decisions and adjudicating the correct result

LEADERSHIP & INVOLVEMENT

UCLA Football and Bruin Sports Analytics

President, Previous Football Consulting Head

October 2023 - June 2026

- Utilized advanced PFF data to assist the UCLA Football team for opposition scouting and self-scouting operations
- Oversaw team of other consultants to ensure high quality work, met deadlines, and expansion of team responsibilities
- Managed Google Cloud Database, supported by BigQuery, deployed to web via ShinyApps.io
- Engaged with PFF Ultimate metrics to increase and enhance UCLA Football's analytic processes throughout the building

UCLA Statistics Club and DataFest Committee

Former: DataFest Co-Chair; Current: Advisor

October 2024 - Present

- Organized the largest West Coast data science hackathon in the country with over 500 students
- Conducted popular workshops on statistical modeling, visualization, and big data using DuckDB, BigQuery, and more
- Collaborated with professors in the department of Statistics and Data Science to support student academics
- Constructed community among students to further the mission of UCLA Statistics

Research Projects

Cincinnati Reds Hackathon 2025

Predicting Future Playing Time ([link](#))

February 2025

- 2nd Place out of 37 entries for technical portion (scoring based on RMSE)
- Presented for Reds analytics staff and finished 2nd place in the presentation competition

Big Data Bowl 2025 Entry

Defending The Go-Gos: Predicting Slot WR Routes ([link](#))

January 2025

- Research paper written using the NFL's proprietary spatial tracking data
- Built ML model to help slot corners play man coverage and allow greater defensive success and diversity of scheme by predicting route break and depth

Carnegie Mellon Sports Analytics Conference 2024

Digging Deeper: Volleyball Metrics with Full-Court Coverage ([link](#))

November 2024

- Presented at Carnegie Mellon Sports Analytics Conference on November 2nd, 2024 with funding from UCLA Undergraduate Research Center-Sciences Grant
- Analyzed 6531 ball contacts, built comprehensive statistics to measure player performance, predict future and hypothetical match outcomes, and enhance viewer enjoyment of volleyball
- Since 2024, has been expanded into a full-fledged application for UCLA Volleyball to analyze NCAA performance

Programming

- R (Tidyverse, Tidymodels, ggplot, brms), Python (Polars, Scikit-Learn, Optuna), Julia, SQL (DuckDB, BigQuery), Airflow
